CAREER OBJECTIVE

Full stack developer who has experience in individually building full web applications. Also working with 4 man web development teams where I was fully trained in the work flow, how to organize and build a user journey, and how to communicate effectively with the PM / team members.

PROFESSIONAL EXPERIENCE

Le Wagon fullstack coding bootcamp

October - December 2019

Web developer

- *Successfully executed every assignment that our lead designer gave me by jumping into foreign territory and reworking APIs to fit our needs.*
- Toured and interviewed big name companies in China, including Tencent.
- Mastered the app development roadmap and what it takes to publish a project.
- Experience coding solo, with a partner and in teams of 4.
- Built a fully functional, interactive JavaScript 3D globe without any prior animation or canvas knowledge and resourced using online articles in order to make the globe meet my teams requirements.

EDUCATION

2nd year at California State University San Marcos. My current major is computer science
